***Allowable Subject Matter***

1. Claims 1-9 and 12-46 are allowed over prior art.
2. The following is an examiner's statement of reasons for allowance: The prior art fail to teach or suggest determining dynamic exact first values for multiple parameters response to the characteristics of a communication link, and the adjusting step include linearly mixing each current first value for the multiple parameters with a corresponding dynamic exact first value. In addition, although the prior art of Reza et al (US 6,654,384 B1) discloses adaptive point-to-multipoint wireless communication whereby adjusting values of multiple parameters is implemented, Reza et al (US 6,654,384 B1) does not claim determining dynamic exact first values for multiple parameters response to the characteristics of a communication link, and the adjusting step include linearly mixing each current first value for the multiple parameters with a corresponding dynamic exact first value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prenell P. Jones whose telephone number is 571-272-3180. The examiner can normally be reached on 9:00-5:30.
